

MAXIM STRELETS

Coquitlam, BC | +16045062409 | msa433@sfu.ca

Summary

- Interactive Arts & Technology student with UX experience designing user flows, wireframes, and interactive prototypes for web projects.
- Strong foundation in user-centered design, information architecture, and accessibility.
- Skilled in programming and proficient with design tools (Figma, Adobe Creative Suite).
- Collaborative team member with analytical thinking and strong attention to detail.

Skills

- **Software:** HTML/CSS, Processing, Adobe Illustrator, Adobe Photoshop, Adobe After Effects, Adobe InDesign, Figma, Microsoft Office Suite, Autodesk Maya.
- **Operating Systems:** Windows, Macintosh.
- **Design Skills:** User-Centered Design, Information Architecture, Interface Design, Wireframing, Prototyping, Usability Testing, Interaction Design, Accessibility Awareness.
- **Soft Skills:** Teamwork, Time Management, Adaptability, Multitasking.

Experience

Academic Project	Simon Fraser University, Surrey	Feb 2026 – Mar 2026
------------------	---------------------------------	---------------------

Bakery Website (Course Name: Web Design and Development)

- Designed a multi-page bakery website in Figma with structured layouts and clear navigation, applying UX principles to improve usability.
- Developed a style guide to maintain consistency in typography, color, and UI components, strengthening visual identity and UX across pages.
- Implemented responsive HTML/CSS layouts, translating designs into accessible, user-friendly pages.

Academic Project	Simon Fraser University, Surrey	Nov 2025 – Dec 2025
------------------	---------------------------------	---------------------

Pet Shelter Website (Course Name: Information Design)

- Collaborated in a team of four to create UX-focused wireframes, UI layouts, and responsive designs, refining the experience through feedback to enhance usability.
- Designed user flows, wireframes, and UI layouts in Figma for a responsive website, improving navigation clarity and user browsing experience.
- Built Animals Catalogue pages using HTML and CSS, ensuring clarity and accessibility.

Microsite for “To Dye For” Exhibition (Course Name: Foundations for Designing Interactions)

- Collaborated in a team of five to design a website, focusing on engaging digital storytelling and user-centered navigation.
- Conducted user and content research to inform design decisions and align the experience with the exhibition's themes, improving user engagement.
- Developed wireframes and interactive prototypes in Figma, incorporating visual storytelling to create a more intuitive and immersive experience.

AI Activity Support

- Guided 100+ visitors through an AI-powered lyric generation activity, reviewing submissions and explaining prompts.
- Worked closely with staff to ensure smooth visitor flow and consistent support.
- Supported general visitor experience by answering questions and facilitating interactive exhibits in a fast-paced environment.

Education

Intended Major: Interactive Arts & Technology, Bachelor of Science Degree

Intended Concentrations: Design and Development for Web & Mobile; Designing Interactions.

Simon Fraser University, Surrey

Expected Graduation: May 2028

1st year Program: Communication, Art & Technology.

Fraser International College, Burnaby

September 2023 - December 2024

Recipient of the Resiliency Award

Related Courses: Information Design; Graphic Design; Foundations for Designing Interactions.

Digital Games: Genre, Structure, Programming and Play.

Interests

- Detective & action books and series.
- Urban and nature photography.
- Rock and metal music.
